**The elementary technology teacher instructs students in basic computer, digital, and technologic skills, integrating technology into the curriculum, and collaborating with other teachers to enhance student learning.**

**Responsibilities:**

**Instruction:**
- Plan and deliver age-appropriate technology lessons, focusing on computer literacy, digital tools, and emerging technologies.
- Teach students how to use software, online resources, and other digital tools effectively.
- Facilitate hands-on projects and experiments that allow students to learn by doing and exploring.
- Use technology to promote learning, creativity, and collaboration.

**Curriculum Integration:**
- Work closely with classroom teachers to integrate technology into the core curriculum.
- Develop and implement technology-rich lesson plans that align with educational standards.
- Ensure that technology use is consistent across subject areas.

**Collaboration:**
- Collaborate with teachers, administrators, and other staff to develop and implement technology initiatives.
- Provide professional development and training to teachers on using technology effectively.

**Assessment:**
- Evaluate student learning and provide feedback on their use of technology.
- Monitor student progress and adjust instruction as needed.

**Other Duties:**
- Maintain and organize technology equipment and resources.
- Stay up-to-date on current technology trends and best practices.

**Skills and Experience:**

### Experience:

Experience teaching elementary students, particularly in a technology-rich environment, is preferred.

### Technical Skills:

Strong computer literacy and proficiency in using various software and online tools.

### Teaching Skills:

Ability to plan, organize, and deliver engaging lessons.

### Communication and Collaboration:

Excellent communication and interpersonal skills to work effectively with students, teachers, and parents.

### Classroom Management:

Strong classroom management skills to maintain a positive and productive learning environment.
